Re: FA4659-04-C-C005, Grand Forks Air Force Base, Runway 17-35 Repair

Jason,

We appreciate your quick response to our request from your firm to assist us in bringing this project back onto schedule.

Since Antigo's arrival on the project, your daily production has exceeded your quoted amounts and we are well within bringing this project back in line to our original projected schedule.

The Air Force is very satisfied with the rubbilizing quality on the pavements varying from 16-29" inches thick.

Once again, thank you, and we appreciate your assistance.

Sincerely,

Steve Griffin
General Manager
